DStv Mobile Decoder

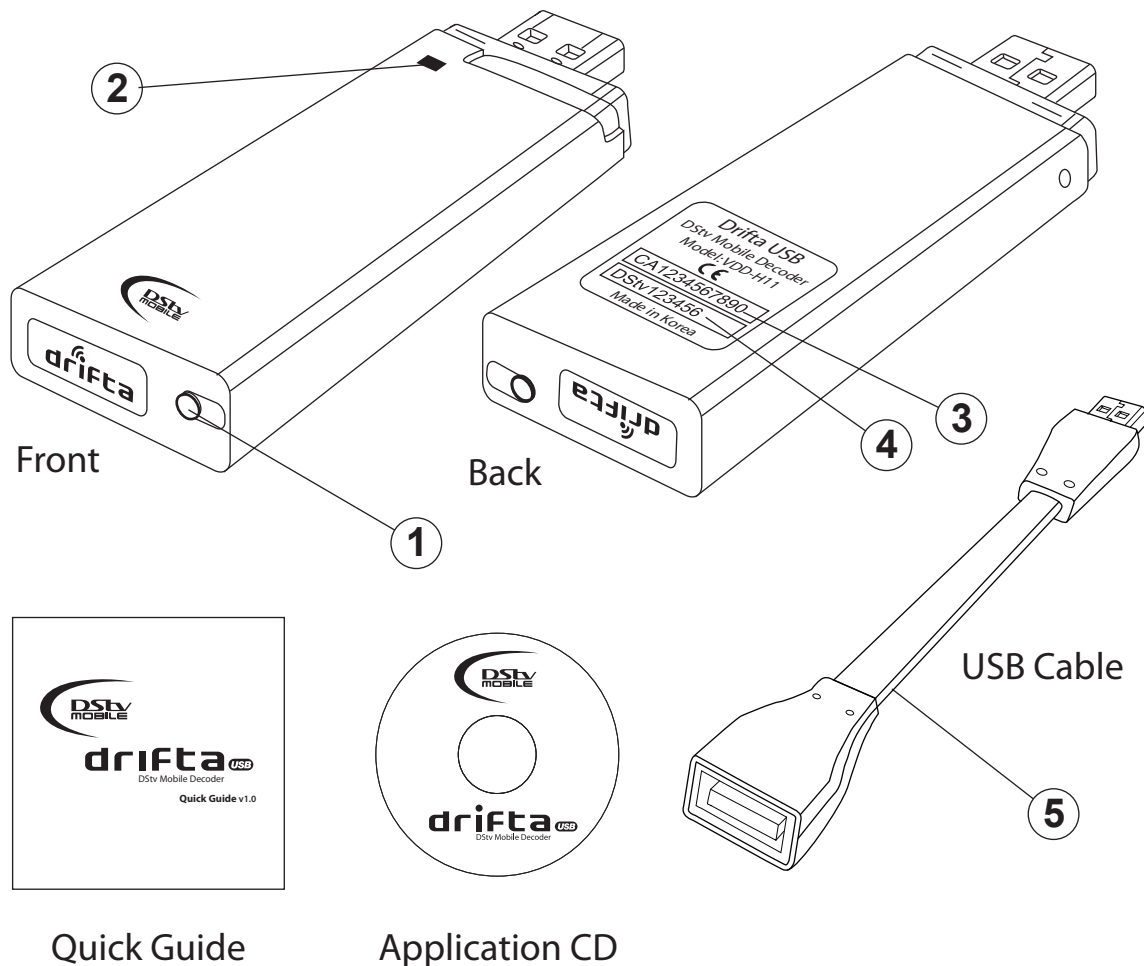

Quick Guide v1.0

Welcome to the exciting world of DStv Mobile. With your Drifta USB DStv Mobile Decoder, you will be able to connect to DVB-H broadcast mobile TV and have access to DStv Mobile content live on your PC.

This guide will help you connect the Drifta USB to your PC so you can start watching right away.

Step 1: Familiarize yourself with the hardware

Included with the Drifta USB device are a USB cable, application CD and this quick guide.

1. Antenna for receiving the DVB-H signal. This can be extended and positioned vertically to improve signal reception.
2. DVB-H signal light indicates the status:
 - Green fast flicker - Drifta USB has been turned on.
 - Green slow flicker - Drifta USB is searching for DVB-H signal.
 - Green steady light - DVB-H signal searching complete and good.
 - Red slow flicker - Drifta USB failed to find a DVB-H signal.
 - Red steady light - Error. Disconnect then reconnect the Drifta USB.
3. Device Serial Number
4. CAS Number is used in conjunction with the Device Serial Number when activating the device.
5. The USB cable allows you to extend the USB connection.

Step 2: Install the Application

! Important:

Do not connect the Drifta USB to the PC before installing the software!

Minimum System Requirements

Operating System: Windows XP, Vista or 7

Processor: 32 Bit or 64 Bit

Minimum Memory: 512MB

Minimum Disk Space: 100 MB

USB Port

Installing the Application

Insert the Drifta Application CD and run the Windows setup application. Complete the installation.

Step 3: Activate your Drifta USB

Your Drifta USB needs to be activated before using the service.

1. Connect the Drifta to the PC.
2. Wait for the DVB-H light to go steady green - this may take up to 3 minutes when starting the Drifta for the first time.
3. Contact MultiChoice Customer Care to activate your device.

South Africa: +27 11 289 2222

Ghana : +233 302 740 540

Kenya : +254 20 444 9000

Namibia : +264 61 270 5222

Nigeria : +234 1 270 3232

Step 4: Launch the Application

1. Ensure that the Drifta USB is connected to the PC and the DVB-H light is steady green.
2. Launch the Drifta USB application on your PC.
3. The application will perform a channel scan and start playing mobile TV.
4. Click on the schedule icon to display all available channels and their schedules.
5. Double click on a channel in the listing to change to that channel.
 - To start watching, simply select your channel of choice.
 - Selecting the 'more' button corresponding to a channel will display the channels schedule for the next 24 hours.

? About DVB-H

DVB-H is a technology that delivers video to mobile devices at a resolution of 320 by 240 pixels. It uses a terrestrial broadcast, similar to radio, unlike the satellite technology used for your DStv service at home. This means that you can enjoy Mobile TV on the move when in a DVB-H broadcast coverage area.

- Windows is a trademark of Microsoft.
